FULL STACK DEVELOPER

Self-taught **MERN Full Stack** developer with **1 year** of industrial experience. I have a solid grasp of **REST APIs, NoSQL databases, Node.js, React.js** and more. I have a strong technical foundation in software development and An ability to work together with a large team, Skill with multitasking and time management.

TECHNICAL SKILLS

Languages : JavaScript, Typescript, HTML, CSS
Frameworks : Express
Servers : Node.js
Libraries : React.js, Redux, React Router
Cloud Platforms : AmazonWebServices(AWS)EC2,Netlify, DigitalOcean
Databases : MongoDB,PostgreSQL
version Controls : Git, GitHub
API Development: RESTful API
API Testing : Postman
Architecture : MVC
Design Tools : Figma

EXPERIENCE

MERN Full Stack Developer Intern

Besent Technologies

jan 2023 – Present
Remote – Kochi, Kerala, India

- I designed and deployed a high-performance E-commerce website that is interactive and adaptable, using **Handlebars, CSS, JavaScript**. I utilized advanced technologies such as **Node.js, Express.js, Mongoose**, and **MongoDB** for this e-commerce project. It was organized following a Model-View-Controller (MVC) approach, which ensures easy management and scalability
- Worked with **REST APIs** to retrieve and display data from databases
- I have experience working with **AWS** setting up automated deployment processes using GitHub Actions for **Continuous Integration** and **Continuous Deployment(CI/CD)**

Front End with React js

Besent Technologies

jan 2022 – sep 2022
Bangalore, Karnataka, India

- Completed an intensive front-end development internship focused on React.js, gaining hands-on experience in crafting dynamic and responsive user interfaces
- Created an extensive internship portfolio, featuring advanced CRUD operation skills. projects involved recreating user interfaces platforms such as Netflix and IMDb, highlighting strong focus on user experience

Technical Support Engineer

Apr 2020 – Sep 2021

- Aabasoft is a client oriented company. Our philosophy is to have the client at the focus point of all discussions and planning **Packetloss, Power level, and Troubleshooting**

EDUCATION

Bachelor of Science in Computer Science

Al-Ameen College, Mahatma Gandhi University Kottayam

Aluva, Kochi, India
Jan 2017 – Apr 2020

I'm a Computer Science graduate with a BSc degree, and I'm looking for a job where I can use my computer skills to solve problems. During my degree, I learned a lot about computer science, including data structures, programming, and software development. I gained hands-on experience through various projects, which helped me become a better problem solver. Now, I'm eager to put my knowledge to work in a challenging position in the field and contribute to innovative solutions while continuing to grow in my career. I'm passionate about using technology to make a positive impact, and I'm excited to take on new challenges and learn even more in this dynamic and exciting industry. I'm dedicated to staying up-to-date with the latest advancements in the field and continuously improving my skills to meet the evolving demands of the technology world.

Computer Science

Government Higher Secondary School Edathala

Aluva, Kochi, India

Jan 2015 – Apr 2017

In my high school, I pursued a comprehensive Computer Science program as part of my plus2 curriculum. This course provided me with a strong foundation in computer science principles, algorithms, and programming concepts. Throughout the program, I gained valuable knowledge in areas such as data structures, algorithms, and programming languages. This educational experience not only equipped me with essential skills but also ignited my passion for the field of computer science. It laid the groundwork for my continued journey in higher education and my pursuit of a fulfilling career in this dynamic and ever-evolving field

PROJECTS

Fresh-Hub E-commerce website

Handlebars, CSS, Nodejs, Express.js, MongoDB, Git, AWS

[Source Code](#)

- I designed and developed a modern website using **Node.js, Express.js, and MongoDB** utilized technologies like **Handlebars, CSS, and JavaScript**
- This project involved creating a tailored food ordering website for a specific restaurant, guaranteeing a seamless and enjoyable dining experience for users
- Implemented session and cookies for authentication, with **Twilio Authentication API for 2FA**.
- Integrated **Razorpay** for payment processing, supporting both online payments and COD.
- I implemented an **MVC architecture** to manage and scale the application effectively.
- The application was hosted on **AWS EC2 with nginx** for reliable and scalable deployment
- I also set up automated deployment processes using GitHub Actions for Continuous Integration and Continuous Deployment (**CI/CD**).

User Managemnet System

React.js, Node.js, Express, JavaScript, MongoDB Git

[Source Code](#)

- A Create a user schema with fields such as name, email, password, and points to store user information and their points
- Build the React frontend for user management. Create components for displaying user information and implementing the point system. Use Axios or the fetch API to make HTTP requests to Express API. **Express**

Crud operation

React.js, MockApi, axios, JavaScript, Git

[Source Code](#)

- Build a React js CRUD Application to consume Web API, display and modify data with **Router, Axios, MockApi Material UI**
- React Tutorial Application in that:- **Add User, Update User, DeleteUser, ViewUsers**

Netflix

React.js, Redux, Context, JavaScript, Api, Git

[Source Code](#)

- Developed a Netflix clone web application using **React and Axios**, allowing users to browse and watch their favorite movies and TV shows
- Implemented features such as user authentication and **search functionality**

Portfolio

React, javascript, Tailwind, Bootstarp, Git

[Source Code](#)

- take on responsive React portfolio website from scratch using **Tailwind CSS** and deploying it to server
- We can learn a lot of amazing things including tailwind, **smooth scroll, adding social icons, custom fonts, gradient background**, and **responsive design**
- Deploying the project we will be using **Netlify**. We will use **tailwind** for our CSS instead of using custom CSS.
